Lotus Functional Fertility Programs

Dr. Milan Chavarkar DNP, RN

Dr. Milan Chavarkar DNP, RN is a functional fertility specialist. She is using functional medicine and natural fertility clinical protocols which have been used successfully to help women to conceive, increase the chances of healthy pregnancy for all women, and improve the outcomes of pregnancy. Conditions such as fibroids, endometriosis, polycystic ovaries, thyroid disease, cardiovascular disease are just a few conditions that are addressed in our programs.

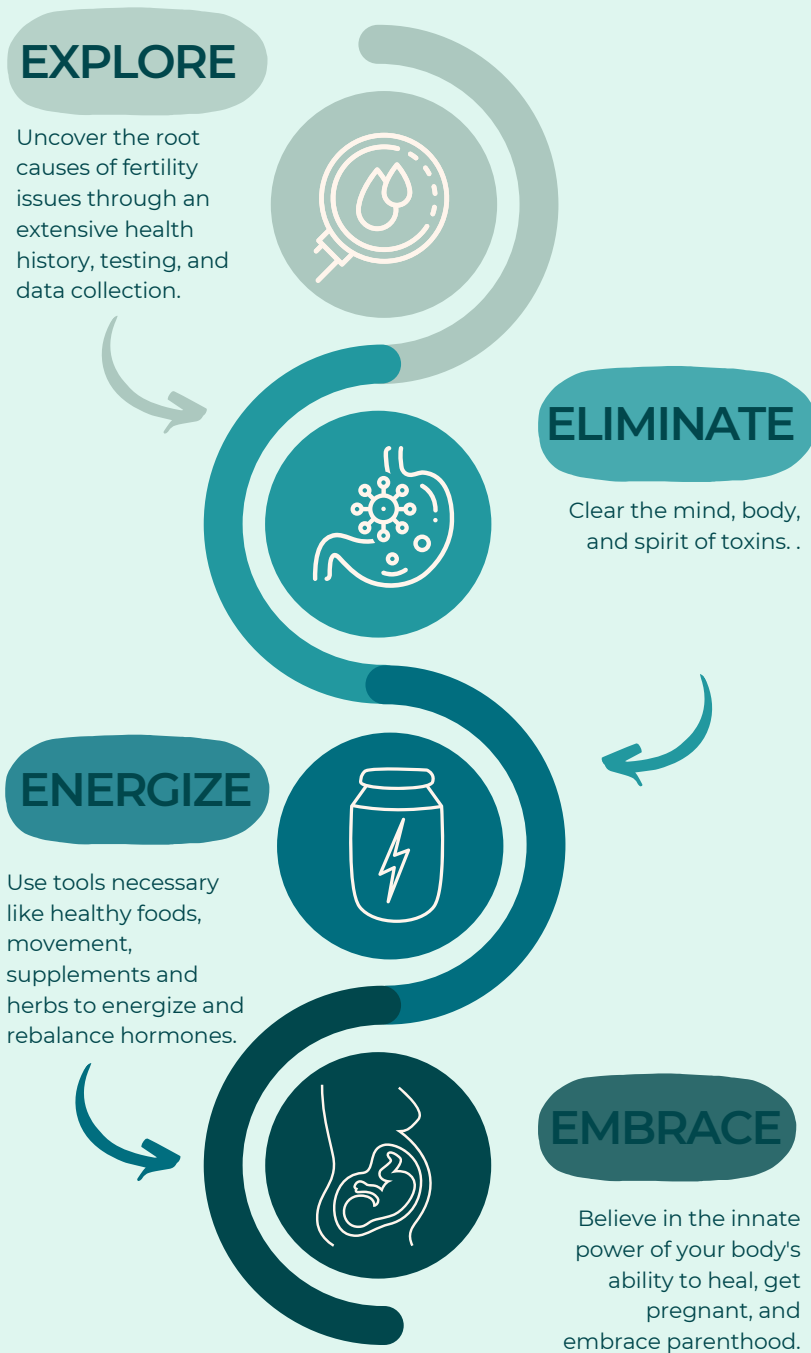

Our goal is to help in the creation of healthy families!

Our programs are for those prospective parents who are:

- Planning a pregnancy and would like to be in optimal health
- Having trouble conceiving and need help identifying the cause
- Struggling with medical issues that reduce fertility
- Working with a reproductive endocrinologist and are about to start fertility treatments.
- Interested in trying a holistic approach after trying artificial reproductive technologies.

The Four Steps To Optimal Fertility

Our program has 4 phases which usually take 3-6 months for the average client to prepare for a healthy pregnancy by stabilizing hormones, decreasing inflammation, improving egg quality, and preparing to embrace pregnancy. All programs apply to one or both partners, as they are equally important in the process. We work with men to improve their health and sperm quality. Healthy bodies (eggs and sperm) make healthy babies.

Step 1- Explore the Root Cause

This step is the most important. We will spend lots of time talking. The true art of healing is in the coach-client relationship. We will learn more about you and your partner, your health symptoms, and fertility journey. We will put all of those pieces of the puzzle together to determine WHY this journey has been or could be a struggle for you. Based on your history, we will develop a plan of actionable lifestyle changes. We help you obtain specific functional medicine tests if necessary so you can understand the root cause of problems.

Step 2- Eliminate Toxins from the Body

Elimination of toxins is individualized for each couple. We want to remove toxins in the body, especially the ones known to be harmful for fertility and to the health of a baby. Detoxification involves assessing the impact of external hormones from IVF, IUI, or oral contraceptive use, eliminating environmental toxins, and stopping substance use such as cigarettes, alcohol, and recreational drugs. Healthy eating support will also eliminate exposure to toxins in our foods.

Step 3- Energize the body by rebalancing hormones

Hormonal rebalancing is key to fertility care success. You will take specific action based on the results of your functional medicine testing and use supplements, herbs, monitoring cycles, modifying food plans, and lifestyle changes to impact health and achieve true healing. We will monitor closely and keep an eye on how both of you are responding to the lifestyle interventions with regular communication and coaching.

Step 4- Embrace Pregnancy and Parenting

Our functional fertility programs are based on a compilation of fertility research, results, and experience. Even with this program being strongly evidence-based, there is also some unwritten magic in a successful fertility journey. Knowledge and Belief are also important to the process, and our program is here to honor and help couples heal on emotional and spiritual levels through mind-body-spirit healing. We will work with you on a spiritual level to be ready to embrace a pregnancy and become parents to new life.

LOTUS FERTILITY PROGRAM

This is an exclusive one-on-one nurse coaching program with Dr. Milan Chavarkar DNP, RN. All care is available on-line through Zoom.

Includes:

- Individual monthly visits with Dr. Milan DNP, RN
- Tailored education for individuals/couples
- Check-ins with fertility coach monthly
- One visit with a dietician
- Loving support and messaging with Dr. Milan
- Starter video course on functional fertility- Introduction to Functional Fertility, Understanding Hormones and Periods, Understanding Lab Tests, Functional Tests, BBT charting, Fertility Food Plan, Detox and more
- Basal Body Temperature (BBT) Charting/App Guidance
- Fertility Food Plan
- Diva's Guide to Everyday Toxins
- Over-the-counter herbal supplement education
- 10% off herbal supplements through Fullscript
- Discounts on temperature tracker, home lab kits for baseline fertility for men and women, and more
- Use your FSA/HSA!

Please note: There will be additional fees for functional labs and supplements as needed depending on your health issues.

Gynovisceral Manipulation (GVM), Abdominal Reiki Massage and Low-Level Laser (6 sessions).

This program includes 6 sessions of 90-minutes of GVM, reiki massage, and cold low level laser therapy which helps improve circulation and rejuvenates the uterus and ovaries.

This therapy has shown to improve the results of those doing natural fertility work. This hands-on external treatment is especially helpful to those who are planning for IVF. Sessions are done in person at our Campbell office over one week if visiting from out-of-town, or weekly if local.

IVF Prep Program (6 or 12 weeks).

This is a fast track program to get optimal results of functional medicine, GVM, abdominal reiki massage, and low level cold laser to increase vitality of the body, uterus, eggs, and sperm prior to starting IVF or IUI treatment.

Dr. Milan is a licensed nurse and nurse practitioner in the State of California and a registered nurse in Arizona and Washington. She is actively seeking nursing licensure in other states. She is available for educational coaching and consultation in other states.

Meet Your Providers

We provide support, education, and coaching tailored for each individual. We treat them with respect and humanity regardless of background. Our team approach is collaborative and recognizes the value and importance of each discipline in contributing to the vitality and wellness of our clients. We truly feel integrative health care is the key to solving the fertility crisis by emphasizing prevention through natural medicine, lifestyle, and wellness principles. We look forward to serving our clients with compassion and care.

Dr. Milan Chavarkar, DNP, RN

Founder / Functional Fertility Specialist

I started my career as a midwife and have been a family nurse practitioner for 20 years. My own experiences of PCOS, infertility, and motherhood have led me to this calling and I want to use my experience to help people have the families they dream of. With many years of training, I use conventional, integrative, and functional medicine knowledge, natural therapies, health coaching, mindfulness techniques, energy healing, supplements, and herbal therapies to help my clients with fertility issues. I absolutely love my work and value the deep connection I have with my clients.

Amanda Robles, BA
Administrative Assistant

I am a Bay Area native, now residing in the Los Angeles area. I studied and received my Bachelor of Arts degree in Humanities with an emphasis in American studies from San Jose State University. I have always loved performing and have danced from a very young age. I am lucky to share my love for the arts and fitness as a dance instructor for children since 2012. I have extensive administrative background and experience as an office manager, and have enjoyed working in environments that promote healthy living and activity. I love to cook, bake and spend time with my family and puppy. While I currently reside in LA, I am an avid Bay Area sports team fan, and love cheering on my teams. I look forward to assisting patients getting started with our fertility program, and working with both clients and Dr. Milan in all aspects of the program.

Troy Lopez
Certified Personal Trainer

Hello everyone! My name is Troy Lopez. I have been a certified personal trainer since 2012, and fitness has always been a huge part of my life. The beginning of my training was based around sports and athletics, specifically as a competitive wrestler. After suffering a few injuries, I quickly switched things around and expanded my knowledge in rehabilitation and preventative exercise. I continue to expand my education in different areas so that I can be more holistic and this has helped sculpt my training style to be a complete health coach to my clients. My goal is to keep everyone moving, motivated, and energized in a fun, safe, and healthy way.

Julia Jun, RMT, CHC
Certified Medical Reiki Master
Integrative Nutrition Practitioner

I am a Certified Medical Reiki Master as well as a Master Teacher in Usui, Karuna and Holy Fire Reiki. As a Board Certified Member of the American Association of Drugless Practitioners and graduate of the Institute for Integrative Nutrition, I am able to blend lifestyle and nutritional education with energy healing to further support and promote the body's natural ability to balance and heal. My life before energy medicine and holistic health was in the corporate world and I am also a classical violinist. Stress and depression is what had me stuck in my life but thankfully, it was my body's way of guiding me to leave a toxic corporate job and Reiki. I have been practicing energy medicine for almost 20 years, but Reiki finally found me in 2013.

Tim Fortescue, D. Min.
Life Coach

I am the owner and operator of Faithfully Growing, a life coaching practice. I am a professionally trained life coach and hold a Doctor of Ministry in Leadership. For nearly two decades, I have been involved in ministry leadership in the church, community, and seminary settings. During this time, I have been impacted by life coaches and mentors who have helped make my life better. The impact others have had on me has helped me to be able to coach and mentor others.

Nikki Berces-Mardenly, MSN, MPH, RN
Nurse Educator/Coach

I have worked as a nurse practitioner in women's health, internal medicine, urgent care, and nurse oversight for Covid 19 testing while living in California, Washington, Massachusetts and Florida. However, my passion has always been working with women and their families in women's health.

Aside from working in the health field, I enjoy my other role: being a mom to my two teenagers and toy maltipoo dog, Capri. I also enjoy going on dates with my husband, spending time with my very large extended family, catching up with friends, reading, exercising, traveling, going to the beach, and binge-watching shows.

My Philosophy of Care: Although a focus on prevention is important, emphasis on having a balanced life is essential. Through empathy and understanding, I believe that sustaining a partnership with patients is key in promoting healthy lifestyles and well-being.

Steps for Favorable Fertility

Water

Drink 1/2
your body
weight in oz
per day

Smoking/ Drinking

Damages
eggs &
sperm cells

Exercise

Not too
much & not
too little

Coffee

Only OK if
you don't
need it,
otherwise it's
damaging
your adrenals

Diet

Whole foods
only, lots of
variety of
veggies

Sleep

Crucial for
melatonin
production
for egg and
sperm health
